DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The instantly claimed perfluoropolyether esters and lubricants derived therefrom are neither disclosed nor fairly suggested by the closest prior art: Kondo et al (US 5,431,833 07-1995). Kondo teaches (Column 6, lines 14-25, and columns 6-7, Table 1 entries A1-A7) a process for the synthesis of a fluorinated diester which has utility as a lubricant/recording medium. Kondo teaches (*ibid.*) the formation of the perfluorinated diester from the reaction of a diol having the structure as set forth in formula (1) in which $R = R^1$ and a monocarboxylic acid chloride. The compounds taught by Kondo therefore differ from those instantly claimed in that Kondo's compounds are terminal alkyl esters while those instantly claimed, being formed from dicarboxylic acids, have repeat dicarboxylic acid-derived units and are terminated by hydroxyl or carboxyl groups. Kondo neither discloses nor fairly suggests reacting his alcohols with dicarboxylic acids. The instantly claimed perfluoropolyether esters and lubricants derived therefrom are therefore patentable over the teaching of Kondo, the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
